## Edge To Edge Back Lighting

Microscan's wide range of NERLITE products can illuminate any part or mark for successful machine vision and auto ID applications.

The Edge To Edge series of backlight illuminators provide sharp contrast to outline a part's shape, find edges and view openings such as drilled holes. Edge To Edge technology allows combining multiple lights to address large field of view applications. High intensity and uniformity are packed into a low-profile industrial package for optimal thermal management.

### Backlight: At a Glance

- Multiple lights may be combined to create larger illuminated areas
- Variety of colors and wavelengths for both continuous and strobed power sources
- High level of uniformity for repeatable results
- M12 connectors for easy connections to power supplies, drivers or advanced controllers
- Low profile, compact shape for flexible integration
